Dear friends

As a leading fitness equipment brand in China, SHUHUA specialises in developing and creating scientific fitness solutions for its clients, helping people to reach health goals wholeheartedly. For more than 24 years, SHUHUA has been sticking to the mission of letting easy exercise blend into everyone's life, and thus is distinguished from others in fitness industry.

Till now, it has reached cooperation with Beijing Sport University, Shanghai Sport University and multiple experts from fitness and medical fields, offering supports and tests to various fitness machines, and making sure that the top level of ergonomics and biomechanics are applied. Besides, SHUHUA engineers and design teams spend thousands of working hours in developing new products that are professional, safe, easy to use and humanized, which can meet exercise demands of different fitness levels, from beginners to professional athletes covering all ages, sexes and places.

SHUHUA has been devoted to providing professional solutions and reliable after-sales networks, giving people access to health in fitness center, hotel, school, home, office, hospital and community center.

SHUHUA is strongly convinced that everyone has access to health, that government can cut down its expenses on public health, enterprises can enhance team work and production, and all people can improve their health. Shuhua is adhering to continuous innovations, sticking to intelligent and scientific fitness solutions, and advocating easy way of fitness, and it will do so in the future for a better society.

## Commercial Fitness Solutions.

### Professional Control, Fully Customizable

From project investment analysis to decoration design until operation management, Shuhua provides professional and scientific solutions to your gym, meets all your needs.

# SH-T9100T

Commercial use treadmill

- Multi-brace shock absorbers for whole-deck.

- Infrared Auto-Induction
- Safety Detection
- Red-Blue-Green lights show running state.

- Ergonomics interface
- New angle strengthens the visual experience from people at different heights, and helps user keep the right posture.
- Handle adjust speed and inclination

- Built-in Siemens Sinamics V20 inverter
- As a driving belt, adjust the speed of key equipment, SINAMICS V20 can effectively guarantee the stability of the treadmill belt speed, eliminate the frustration during running and improve running comfort.

- Optional ultra high-definition touch screen
- 32-inch high-definition smart touch screen, support multiple login methods, rich content

- Maintenance free running belt
- Pre-waxed running deck, free of lubrication, optional use of either side.
- Neat appearance without screws exposed.

## Treadmills X9/S-5918

### Ergonomics interface

New angle strengthens the visual experience from people at different heights, and helps user keep the right posture.

### Handlebar design

PU foaming handlebars comfortable and high-end; Handlebar length is more professional and safe.

### Heart rate control system

Heart rate control function monitor the runner's heart rate and control running speed accordingly, which is much safer to user.

### Recognized user interface

LED display screen:

- (1) Calorie Coach: calorie count
- (2) Integrated adjustable inside fan
- (3) Hand pulse sensor for constant heart rate monitor
- (4) Cool Down: The button to make you relax and comfortable

### Comfortable, safe and durable runningdeck

Wider and longer running surface is more durable than before. To ensure its long-term relax running experience

Anti-static, anti-abrasive, anti-slip, thicker running belt

High strength and density, anti-abrasive running composite deck  
Premium cushioning silica gel pad, multiple shock absorption design

### High horse power motor (F level)

F level high horse power motor offers continuous power.

Compared to competitors who supply equipment with the same performance, it saves energy and reduces carbon emission.

### 6 exercise programs for choice

Hill, hillside, interval, fat loss, heart and lung, random mode, and 3 countdown modes (time, distance, calorie), plus relax and downhill function

### Frequency Inverter

We use "Rhymebus" inverter from Taiwan, which is specialized in supplying AC Inverter, Auxiliary Control Equipment, and Project Design of Automation Control System Integration. It starts from year 1987, now become the most professional company in this industry.

# 68 Series

- 68 series is Shuhua's latest strength equipment. Our teams spend much time in developing and designing 68 series.
- Premium quality material and skilled technology, pleasure experience, new design and comfortable feeling, all those vantages make exercise simply, easy and effective.
- The 68 series strength equipment has 40 types, professionally and compressively, including plated-loaded, plate-hanged and free weight. User builds muscles according to their needs.

# 68 SERIES Power Equipment

68 series is Shuhua's latest strength equipment. Our teams spend much time in developing and designing 68 series.

Premium quality material and skilled technology, pleasure experience, new design and comfortable feeling, all those vantages make exercise simply, easy and effective.

The 68 series strength equipment has 40 types, professionally and compressively, including plated-loaded, plate-hanged and free weight. User builds muscles according to their needs.

## Path of motion

Lots of exercise patterns are monitored. And we analyze it precisely and particularly, getting the best movement tracks of equipment. 68 series accord with natural movement of body muscle groups. Maximumly, it protects joints when user is building muscle.

## Load distribution

Optimal load distribution of equipment is acquired by testing users at different figures and researching follow-up analysis. So load is distributed according to movement tracks, which is convenient to users.

## Adjustable installation

Few steps need to be set before exercise; all adjustments are reachable in training position. In addition, set adjustable installation in the same position possibly. Progressive adjustor makes exercise easy and control exercise intensity. Using rare metal material is durable, absorptive, anti-drop, safe and stable.

## SH-relaxer

Shuhua R&D advances the concept, studying the single muscle and its status in compound exercise. We apply those researches to products, and simulate body's natural movement. During exercise, resistance force stays the same, making the smooth exercise experience.

## Smooth traction

Weight plate is added, and parts of it reach 135KG. Under the circumstance, user still can use easily because of PA wire rope imported from Japan.

## Biomechanics chair

Ergonomics chair and two-piece back design help user get the right posture during exercise. We adopt different density filler and offer soft or tough support where needed according to body shape. Wide and comfortable chair is for giant user, lower height of chair is for short stature user. Seat mat of Dual-rail and fixed design is stable, comfortable and durable.

## Perfect handlebar

New handlebar design distributes loads balancely, making exercise more effective and comfortable. Chromium plating surface is easy to grip tightly, avoiding sideslip.

## V68T Series

Brand new intelligent V68T series with internet connection, creative movement track, shopping , reading, gaming and other intelligent functions display an all dimensional intelligent experience.

# 88 SERIES

CLASSIC, INNOVATIVE AND BEYOND

## Selling Features

Ergonomic design, smooth movement trace, accurate angle and the target muscle group is precisely stimulated

First-class production technology: laser cutting, robot welding, high-quality spraying

Laser engraving technology, luxury drawing texture

5kgs/pc weight stack adjustment, suitable for beginners to professional athletes

Adjustable handle to meet the needs of different users

Most tube thickness is 3mm, and the supporting tube can reach 5mm.

Semi-automatic adjustment seat with hydraulic design for easy and precise adjustment

The cushion: PU foam with memory resilience.  
Outer layer: Carbon fiber leather.  
The periphery: ergonomic beveled edge
